

What you learn:

1. Year One –

Residential and Commercial Plumbing topics presented, basic plumbing principles, common codes, brazing safety, water heaters, plumbing rough-in practices and career path potential, and OSHA safety training

2. Year Two –

Builds on fundamentals of year one, piping materials, water sources, potable water distribution, cross-connections protections and additional water heater educations. Code knowledge expanded

3. Year Three –

Basic installation practices, blueprint reading, National Fuel Gas Code, surveying, math and science of plumbing, water treatment, trench safety, electrical controls, wiring

4. Year Four –

Covers residential, commercial, industrial and institutional aspects of plumbing systems, service and repair, installation, heating systems and further exposure to major codes

Why Formal Apprenticeship Training?

- Better employment outcomes, both immediately and for years to come after licensing.
- Better earning potential – in the short and longer term
- Higher levels of job satisfaction and job security

Did you know?

- The U.S. Bureau of Labor Statistics expects about 26 percent growth for plumbers between 2010 and 2020, which is higher growth than the average of 14 percent expected among all occupations.
- Trade schools are a streamlined approach to teaching the skills needed in a fast paced environment that places value on combined classroom and lab exposure.

Lacy Hall, MMM Plumbing, Heating & Air (Amarillo):

"Being a woman, I have found that it can be very intimidating in the plumbing trade. But now that I'm in the PHCC Texas Apprentice Training Program, I have been given the confidence to learn and ask lots of questions to know how the plumbing trade works."

Craig Lewis, R.E.C. Industries (Bryan):

"It may be an overused cliché – but our greatest asset is our people, especially our men and women in the field. The best way to grow our business is through our apprentices. We started our apprenticeship program over 10 years ago, and now we send our apprentices to the PHCC Texas Apprenticeship Program – that's how confident we feel about this program!"

Quality Instruction with Master Plumbers who know the trade and have years of hands on experience. You receive exposure to residential, commercial and industrial plumbing situations. You bring that knowledge back to your job immediately.

Who Can Attend?

If you work for a PHCC member company, you qualify to attend this program. Your company is billed at the end of each quarterly session. PHCC works with the Texas Workforce Commission to keep costs low by applying for grants and other funds when the opportunities exist.

How do I apply?

Contact us if you have a qualified Apprentice who you would like to see trained in a formal setting.
